

We have put together some helpful info to assist our customers with the day to day usage of their device.

Backing up data is very important. Imagine losing all your precious photos or important documents, or even your phone.

Apple have provided their customers with two options to back up their devices. Below we compiled a step by step to help you back up your data via iCloud.

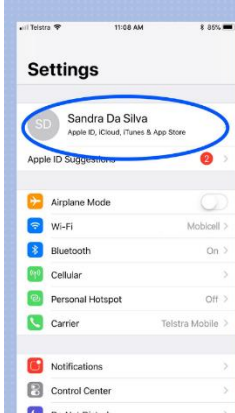

Settings

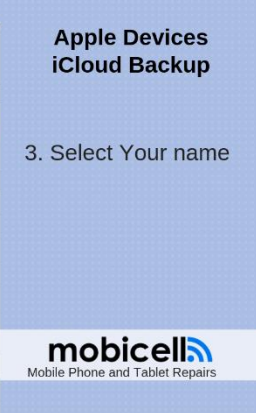

1. Select settings

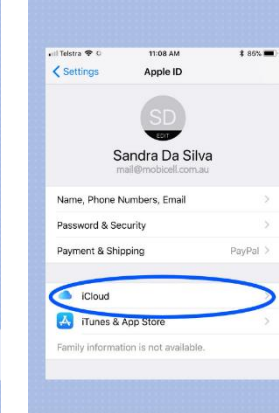

2. Check that your device is connected to a Wi-Fi network.

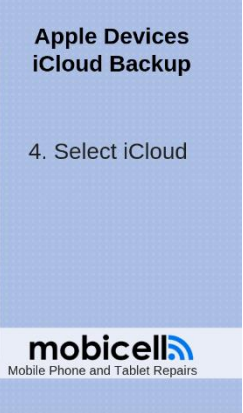

3. Select Your name

4. Select iCloud

5. Scroll down and select iCloud Backup

6. Select the iCloud Backup (Move the toggle switch to the right. Once switched on it will appear green.

7. Select Back Up Now.

To confirm your the backup was successful , go through steps 1 - 6. Under Back Up Now, you will find the date and time of your last backup.

Apple Devices iCloud Backup
To back up automatically each day
Make sure the iCloud Back Up is switched on

1. Connect your device to Wi-Fi
2. Plug your device in to charge.
3. Ensure your device's screen is locked. Remember to check that you have enough iCloud storage. You can do this by signing into your iCloud Account

If you would prefer to back up to iTunes, visit our website www.mobicell.com.au for step by step pictures.
